

TACTICAL POWER SOLUTIONS

# FOBLite 360

## PORTABLE & RECHARGEABLE WORK LIGHTING SYSTEM

- 360° flood, directional flood, or long distance spot lighting modes
- Hand carry Torch Mode or tripod mounted Worklight Mode
- Black Out (GREEN) Mode for night ops
- Energy endurance 32+ hrs on white light and 60+ hrs in Black Out

## THE 'RIGHT LIGHT' FOR EVERY TASK.

### ONE WORK LIGHT SUITABLE FOR EVERY TASK

No need to carry several products. Unique multi-function design covers every application from 360° area flood light to long distance spot / search light, and everything in between.

Light output can be adjusted down to 8%. For detailed tasks where as much light as possible is required, a power boost function can increase light output to 150%.

### INTEGRATED TRIPOD SYSTEM

Quick deploy folding stabilizer legs and extension poles are integrated into the base of the FOBLite. This gives you enhanced stability on uneven surfaces and the option of working heights up to 70" without needing to carry additional equipment.

### ALWAYS READY WHEN YOU NEED IT

The FOBLite charges from 12, 24 & 110 V supplies meaning you can keep the unit ready and fully charged even when on the move. All units have battery monitoring software to monitor battery and charging status. Battery levels are clearly indicated on the FOBLite to indicate duration left before a re-charge is required.

### UNRIVALED SIZE-TO-WEIGHT RATIO PERFORMANCE

The highest light output efficiency and maximum performance in any remote application with a compact, easy to carry design and minimal physical footprint.

For ease of deployment over longer distances in extreme situations, a lightweight Lithium battery option is available. This provides increased portability in difficult terrain by offering the same performance with a significant weight saving (12 lbs).

### TECHNICAL SPECS

Power	30 W per light panel - 90 W total max
Lumens	Approx 12,000 lumens max
Duration (100% setting)	Up to 8 hours (depending on model)
Dimensions	6.9" H x 8.7" W x 3.9" D (max with panels folded out)
Weight (Lithium unit)	15.9 lbs to 18.5 lbs (approx, depending on model)
Weight (SLA unit)	27.9 lbs (approx)
